

# Framed Inset Cabinet Construction

- 1** Construction is American-sourced plywood. All sides, tops, bottoms, stretchers and shelving are 3/4" thick and the 1/2" back panel is fully captured on four sides.
- 2** Cabinets are dado and glued, while a solid wood face frame is attached using the same dado method and a spline firmly secures the face frame to the cabinet box. Cabinets are individually hand clamped to ensure a rigid cabinet that is true and square.
- 3** Interior components are clear finished maple wood veneers. Finished ends, interiors and panels are covered with wood veneer finishes to match doors.
- 4** Shelving is 3/4".
- 5** Drawer box standard is 5/8" solid American clear maple dovetail with captured bottom.
- 6** Drawer slide standard is Blumotion full extension with soft-close feature.
- 7** Hinge standard is Blum soft-close quick release.
